

## DataTraveler® Locker+ G3 Mac Updater

### System Requirements

- Login as a User with Administrator Privileges
- Mac OS X 10.12.x - Mac OS X 10.15.x
- USB 2.0/USB 3.0 (Type A); (Keyboard and Hubs USB ports not recommended)

**This updater is only for DTLPG3.**

### Mac Updater Instructions

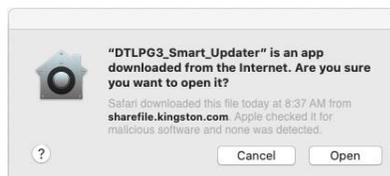

**ATTENTION: It is recommended to backup the data on the drive before using the updater!**

**Note: Backup all data stored on the DTLPG3 and close all applications prior to running the updater.**

1. Remove all other flash devices (e.g., flash media cards, USB flash drives, etc.).
2. Insert the DTLPG3 and make sure it is recognized by your Operating System.

**Caution: Do not remove the drive or interact with any Finder Windows during the updater process.**

3. Double-click DTLPG3\_Mac\_Updater.app to initiate the updater process.
4. Click on **Open\*** to continue.

**Figure 1: Click-on Open**

**\*Note: This is based Mac OS default security settings. The dialog box similar to (Figure 1) will be displayed the first time using the updater after downloading it.**

5. Accept the License Agreement and click **Next** to continue.
6. The software will attempt to detect the DTLPG3 drive.

**Note: If a window is displayed notifying you that DTLPG3 is running, click Next to continue.**

7. An update warning message will be displayed to backup data before updating. When ready click-on **Update** to start the update.
8. A window should appear notifying you that your drive has been updated successfully. Check **Launch** if you want DTLPG3 to launch automatically and then click **Finish**.
9. Once the updater process is complete, you may begin using the DTLPG3 or disconnect the drive.

**If the updater process was unsuccessful, repeat steps 2-8.**

## FAQs

For a complete list of the latest FAQs, go to the DataTraveler website at [www.kingston.com/support/technical/category/usb](http://www.kingston.com/support/technical/category/usb)

**Q1). The reset utility fails to recognize the DTLPG3 even though it is inserted into the USB port.**

**A1).** You may be able to resolve by removing other flash devices such as flash cards and/ or flash drives. Once this is done, exit the updater and launch it again.

**\*If updater still fails to recognize DTLPG3 contact Kingston's Tech Support.**
